

LEAP Into Cancer Care Education Package

Essential education for your role in cancer care

The **LEAP Into Cancer Care** education package supports staff delivering care across the cancer pathway.

It is suitable for those working at supportive and assistive levels of practice, providing a consistent baseline of cancer knowledge and skills – specifically support workers. This package offers a flexible alternative to Principles in Cancer Care Programme and is aligned with the ACCEND framework.

The package includes 10 flexible sections introducing key aspects of cancer care. It can be used as a standard induction for new support workers or accessed flexibly by those already in role. Resources have been developed by Greater Manchester Cancer Alliance and include quality-assured national training offers, helping to avoid duplication and ensure consistent learning.

This offer is accessible beyond Greater Manchester to support wider use and has a nominal fee of £275 to cover licensing costs for enhanced communication skills. For GM staff, funding support may be available. Please speak to your Line Manager or Lead Cancer Nurse.

If you have any questions regarding this package, please email
