

WMCA Primary Care Educational Webinar on Capsule Sponge

We would like to invite you to join our webinar to

‘Ask the Expert’ on:

Tuesday 15th Sep 2026 1pm - 2pm

We invite GP colleagues and other interested clinical staff from primary care across the West Midlands to attend our webinar to learn how capsule sponge can improve the diagnostic pathway for reflux patients to establish if patients are at risk of Barrett's oesophagus. Join us to learn, question, and enhance your clinical approach.

Key learning objectives of the session will include:

- ◆ Understand how the capsule sponge pathway operates within secondary care
- ◆ Improve understanding of the procedure and its benefits
- ◆ Recognise the clinical advantages that improve early diagnosis and patient outcomes.
- ◆ Highlight essential information required for triage.
